Texas Risk and Authorization Management Program Certification

The information below is provided as a companion to the TX-RAMP Certification.

Cloud Service Name

Wicket: Wicket Access

Cloud Service Provider URL

https://www.wicketsoft.com/platform/

Cloud Service Description (200 words or less)

Wicket is a facial authentication platform provider with patented computer vision AI technology that improves fan/guest/employee experiences, empowers facility staff, and strengthens security. Wicket has been deployed for facial ticketing, credentialing, access control, and payments in numerous sports stadiums, major conferences, and corporate office environments.
Wicket is a privacy-first facial authentication company. All of Wicket's facial authentication products are opt-in only. Registered individuals submit their images by choice for frictionless facility access and other benefits. Data is always encrypted, de-identified, wholly owned by the customer, will never be shared with or sold to third parties, and is discarded after a set period of time.
